

## Stainless Steel Deep Drawing Press Processing

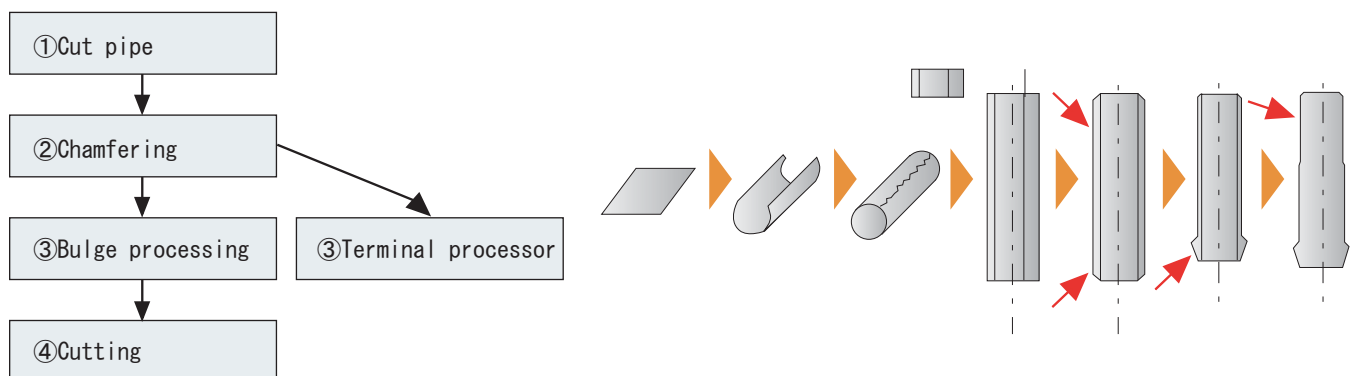

SUS304, SUS316, SUS430, etc.

1. **Seamless pipes** fabricated from a **single sheet** using **deep drawing processing technology!**
2. SUS304, SUS346, SUS430, etc.  
Deep drawing of **highly corrosion-resistant SUS430** is possible!
3. Until now, the ends, which require accuracy, have been processed by cutting, but processing accuracy of **50 μ (tolerance range)** has been achieved using **press processing alone**, thus **eliminating cutting processing**.
4. The elimination of cutting enables thin plates to be used for more lightweight products.

## Stainless Steel Deep Drawing Press Processing Flowchart
